#### CONTENT MANAGEMENT SYSTEMS \* DEVELOPER EXPERIENCE \* FULL STACK DEVELOPMENT \* EXPERIENCE DESIGN

Results-driven, empathetic software engineering leader with a full-stack background. Builder and life-long learner. I ship highly effective, empowered, resilient teams. And code when I have the time.

Strategic thinker, envisioner of the possible, project manager & planner, optimizer of team processes, puzzle lover, empowerer of engineers to do great work and grow their careers.

Frontend	React.js (Javascript) (GraphQL) (HTML) (CSS) (Sass) (Gatsby) (Bootstrap) (D3.js) (Next.js) (Typescript) (core web vitals)
Backend (	Apache GraphQL PHP Node.js MySQL MongoDB PostgreSQL Sequalize Docker Bash AWS Lambda AWS S3
	AWS DynamoDB Elasticsearch
Tools	Docker Git Jest NPM Yarn ESLint Prettier GitHub Actions New Relic
Cloud Platform (	AWS Lambda AWS S3 AWS DynamoDB AWS Relational Database Service
Concepts (	coaching & mentoring (internationalization) (agile scrum) (full stack development) (oAuth) (SEO) (observability & performance)
	team building & leadership scalability key performance metrics technical planning hiring & onboarding risk management
	unit testing core web vitals data visualization problem solving incident management

# Experience

# New Relic - Remote Apr 2022 to Present

## Manager, Software Engineering

Lead a team of engineers that develops the content tooling, sites, and services that power our open source docs & developer websites, as well as in-product help / onboarding content.

- Oversee content system for 500 unique contributors annually.
- Led UI projects to improve user experience on sites (SUPR-Q scores over 4).
- Establish new team and scaled it from 3 to 5 engineers.
- Facilitate feature / system design and architecture planning, drive team technical roadmap
- Lead interviewing, coding exercises, hiring, onboarding, and mentoring of engineers with the goal of quickly making them productive and engaged members of the team
- Establish and track team / system health, and key business metrics to define & ensure team success.
- Work closely with product management / leadership / design / other stakeholders to shape our roadmap, and manage & prioritize the team's work.
- Coach and support engineers to grow their career, take ownership of team systems / technologies / processes, solve problems, continuously improve, and do work they're proud of.

## New Relic - Portland, OR

## Software Engineer

Develop and maintain sites, services, and content tooling to help New Relic's customers onboard and get the most out of the product. Served on and helped lead various teams such as Developer Experience, Developer Enablement, UX Product Language. Served in various orgs such as Growth - User Lifecycle, User Experience Platform, and Experience Design.

- Provide technical input into roadmap planning, prioritize backlog, prototype, scope and plan upcoming work.
- Develop coding standards and excellence in team code reviews
- Improve internationalization system to scale reliably and to support adding full coverage of an additional language in days with machine translation.
- Develop new sites, product UI views, and system to support an program called Instant Observability (collection of quickstart bundles for users to start monitoring their software quickly).
- Migrate Drupal site to Gatsby + Github based system with automation for internationalization, syncing content via various services to New Relic's product UI.

Freelance - Remote Jan 2012 to Jan 2016

### Software Engineer

Develop WordPress and custom PHP sites for various clients for marketing, portfolios, project management needs.

# Education

University of Wisconsin - Whitewater, 2005. Bachelor of Arts - English Education.
